Plant, grow, harvest.

Designed for **happy** planting & harvesting

Nothing tastes better than freedom and independence. No wonder more and more people (especially, in urban areas) are growing their own vegetables and fruit – whether on the smallest balcony, in the seasonal garden or on their own expansive plot of land. We show how easy it is to supplement supermarket shopping with your own produce.

The balcony: For the minimalist

From classic planter boxes to vertical gardening or a potato tower – the balcony offers more space for culinary self-fulfilment than one might initially think. Nevertheless, vegetables, fruit, and herbs on the balcony should be one thing above all: robust and high-yielding.

WHAT GROWS ON A SOUTH-FACING BALCONY?

Welcome to the sunny side of life with the best conditions for a small, self-catering existence. From spring to autumn everything that grows in full sun can be sown and harvested on a south-facing balcony.

However, it can even get too hot for them. Therefore, it is best to provide shade, a sunshade is usually sufficient. Large planters, pots and boxes store water well, so that you don't have to water all the time.

SOUTH

Tomatoes
Strawberries
Rosemary
Courgettes
Bell peppers
Chillis
Peppermint
Chives
Beans
Cucumbers

NORTH

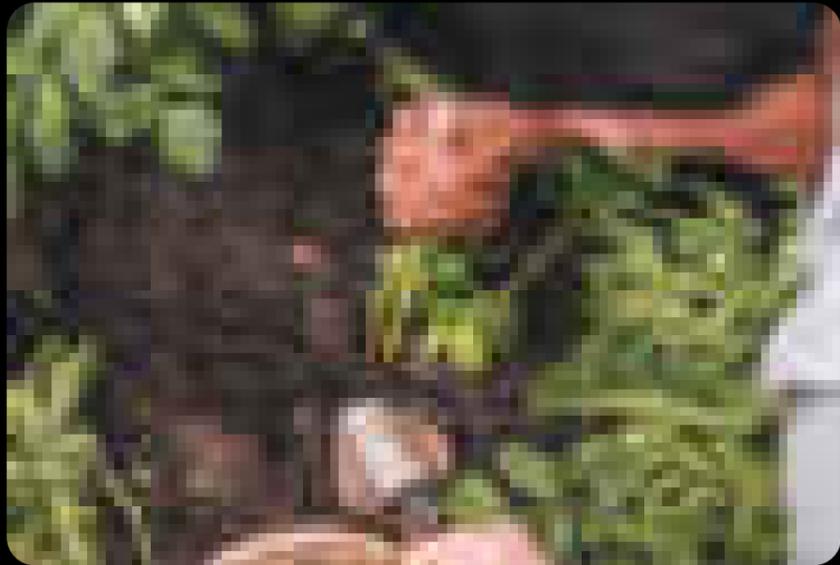

Rocket
Spinach
Ramsons
Chard
Kohlrabi
Radishes
Mache

WHAT GROWS ON A NORTH-FACING BALCONY?

Imagine you live on the Mediterranean. Then someone suddenly transports you to cold climates. You would die, just like plants and herbs from the Mediterranean. So with rosemary or oranges you don't even need to try it on the north balcony. Nevertheless, some things can grow there. It is best not to place the containers directly on the ground, but rather hang them on a railing or in a hanging basket. A bonus: here the plants are more likely to forgive you if you forget to water them.

The seasonal garden: For the part-time self-supporter

Among the top five favourite gardening activities, planting and cultivating fruit and vegetables sits far in the lead. Many people dream of having their own garden, however few can make it a reality. This is why more and more hobby gardeners are renting a seasonal garden.

Here, as the name suggests, it is usually possible to rake, weed and harvest from March to November. Most plots are available in different sizes (from approx. 25 m² to 80 m²). Depending on space and taste, any fruit and vegetables can be planted.

Create a dance of colour with bulbs

The last day of winter easily becomes the first day of spring if you have planted early spring bulbs like snowdrops or galanthus in the autumn months. As spring progresses to summer you can enjoy gently nodding daffodils, vibrant tulips or majestic alliums that impress every year. With these planting tips, next spring is sure to be vibrant and colourful.

PLANTING TIPS FOR TULIP BULBS

1. Fill the planter to about three quarters with soil. Dig a small hole for the bulb.
2. Place the bulb in the soil. Rule of thumb: flower bulbs must be planted three times as deep as the bulb is tall.
3. Cover the bulb loosely with soil. Only water a little, as the bulb won't develop well if too much liquid is added, or even rots.
4. All you need now is a little patience, and in no time you'll be able to enjoy the flowerage.

Planting time: September to December
Blooming period: March to June

The XXL garden: For the all-rounder

No space problems, enough distance and sufficient light – we pay tribute to large gardens. Here you can let off steam and plant what you like all year round. Those who also try their hand at winter vegetables will not only save themselves a trip to the supermarket in the colder season, they'll also do something for their good conscience, as exotic, imported fruit and vegetables often have been transported long distances.

WHAT ARE TYPICAL WINTER VEGETABLES?

Root vegetables: beetroot, parsnips, swede.

Leafy vegetables: mache, endive, chicory.

Cabbage: Curly kale, white cabbage, red cabbage.

WILL MY VEGETABLES FREEZE TO DEATH IN WINTER?

While some of us take out our winter socks at temperatures below 20 degrees, most winter-proof vegetables don't even mind a light blanket of snow. Lettuce leaves freeze in frost, but they also thaw quickly. Wait to harvest them, as they could become mushy.

Why is Fiskars #1 in cutting?

Founded in 1649, Fiskars' iconic heritage of creating highly aesthetic, intuitive tools makes us proud to be a world-renowned expert in two-blade cutting and manual hand tools for gardening enthusiasts all over the world.

Design philosophy

We submerge ourselves in segmentation studies, immersive consumer interviews and usability research to find ingenious ways to continually improve our products. As a result, we've won many awards, including the prestigious RedDot Best of the Best Design Awards.

Innovation

We've developed hundreds of patents and technologies to-date, all designed to help our tools outperform the competition and feel like a natural extension of your body.

Durability & quality

In addition to using only the highest quality materials, all of our products must pass rigorous lab testing before they can be distributed.

Global leader

Already known as the world's #1 brand in scissors, our gardening tools are also top sellers in Europe, North America, Australia and the Middle East.

Commitment

If gardening is happiness, Fiskars is committed to providing tools to help you find 100% happiness in the garden.

Fiskars Pruners

Offer your customers a balance of products from each of our three ranges to ensure quality options for each and every consumer – no matter what motivates them.

Anvil or bypass?

Both blade and counter blade press into the wood to make clean cuts with less compression damage. In other words, the cutting blade bypasses the counter blade in a scissors-like fashion. This makes it possible to cut close to the stem, making bypass pruners ideal for cutting fresh wood.

The upper blade is forced through the wood with greater pressure as the anvil blade supports the branch, spreading pressure until the cut is complete. Anvil blades are ideal for cutting dry or dead wood.

Solid™ Pruners

The “solid choice.”

Simple, effective and affordable with the quality Fiskars is known for. In short, these tools get the job done.

Anvil or bypass?

Both blade and counter blade press into the wood to make clean cuts with less compression damage. In other words, the cutting blade bypasses the counter blade in a scissors-like fashion. This makes it possible to cut close to the stem, making bypass pruners ideal for cutting fresh wood.

The upper blade is forced through the wood with greater pressure as the anvil blade supports the branch, spreading pressure until the cut is complete. Anvil blades are ideal for cutting dry or dead wood.

Recycled materials

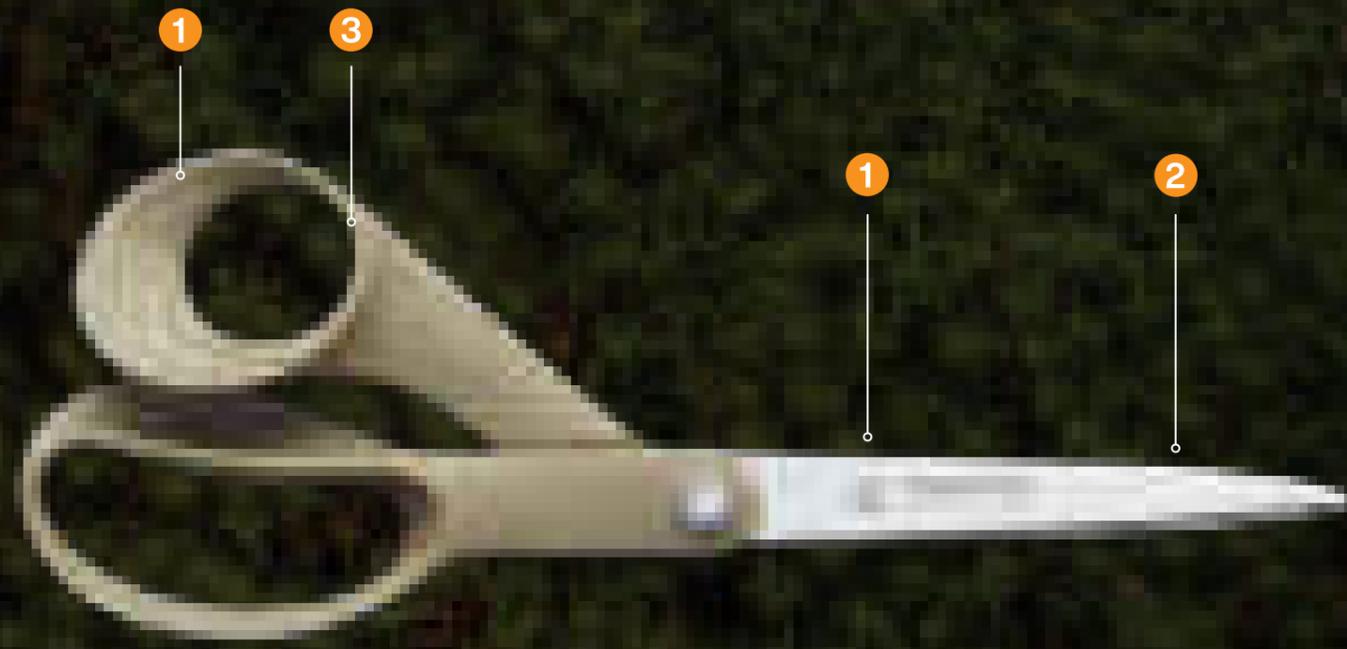

These Fiskars scissors are skillfully crafted from recycled and renewable materials at our factory in Billnäs, Finland. The scissors handles are made from an innovative biocomposite material consisting of 66% recycled post-consumer plastic and 34% renewable cellulose fiber, a sustainable alternative to fossil-based materials. The blades themselves are also made of recycled stainless steel.

In addition to being made of recycled and renewable materials, these scissors, like all Fiskars products, are designed to be of highest quality and to offer long-lasting performance.

StaySharp™

Fiskars StaySharp™ Max Reel Mower promotes greener, healthier lawns by cleanly cutting each blade of grass with a scissors-like action. This minimises the lawn's moisture loss, while reducing exposure to disease.

A reel mower lets you cut grass without noise, uncomfortable vibrations, or any of the hazards associated with power-driven rotary blades. It is one of the most environmentally-friendly ways to cut your lawn.

- StaySharp™ cutting system cuts without unwanted contact for long-lasting performance
- Precision-ground, hardened steel blades
- Ergonomic, height-adjustable handle with padded grip for more comfort
- Directs clippings away from your feet

X-series™ Axes

Fiskars X-Series™ axes are designed for ultimate performance; masterfully balanced to optimise swing speed and amplify user power for efficient splitting. With ultra-sharp, forged steel blades engineered to disperse wood more effectively, double hardened for sharp edge retention. Low-friction blade coating enables glide through after impact and offers rust protection. Over-molded axe heads provides an inseparable connection to the shafts. The virtually unbreakable design includes a lightweight, remarkably strong, FiberComp™ handle that absorbs shock and offers superior overstrike protection.

The handles have an oversized grip-zone with strategically textured SoftGrip™ and hooked end for user comfort. Designed in Billnäs, Finland, building on more than three-and-a-half centuries of the world's best forged tools.

NEW DESIGN

Universal axes

Fiskars next-generation universal axes serve all manners of woodwork, chopping, carpentry and pruning. The range delivers a wonderful package of minimalist design and sharp-edged functionality with the right fit for all wood preparation tasks. Pick your size according to the task at hand. The Universal Axe's thin, wide edge ensures a clean, easy cut in fresh, resinous wood, like spruce or pine.

Splitting axes

Fiskars next-generation splitting axes are a true evolution of craftsmanship –purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

The Splitting Axe features a unique cutting edge that easily slices into the wood, which the thick axe blade then pushes apart.

New improved forged steel blade design adds power and makes the blade easier to remove from wood. Proprietary blade-grinding provides a sharp edge, double-hardened to maintain its sharp edge longer. Low-friction blade coating for easy glide through & rust protection. Ultralight & durable FiberComp™ shaft construction is virtually unbreakable & offers superior overstrike protection. Perfect weight balance for more power at impact. Oversized, textured SoftGrip™ grip zone for comfort and control. 						

X-series™ Axes

Fiskars next-generation splitting axes are a true evolution of craftsmanship, purposefully designed for one-strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

KEY BENEFITS

- ✓ 35 degree convex cutting bevel angle for splitting axes - the convex shape strengthens the edge to make it less sensitive to fracture
- ✓ Perfect balance between head and shaft for the most safe, comfortable and efficient swing
- ✓ Ultralight and durable FiberComp™ shaft minimizes fatigue and makes the axe virtually unbreakable
- ✓ Optimal anti-shock surface structure ensures a comfortable, firm grip
- ✓ Hooked end of the handle prevents the axe from slipping out of the hand
- ✓ Comes with a plastic sheath for easy carrying and storage

Chopping vs. splitting

Chopping axes

Fiskars next-generation chopping axes serve all manners of woodwork, chopping, carpentry and pruning. The range delivers a wonderful package of minimalist design and sharp-edged functionality with the right fit for all wood preparation tasks. Pick your size according to the task at hand.

The Universal Chopping Axe's thin, wide edge ensures a clean, easy cut in fresh, resinous wood, like spruce or pine.

Splitting axes

Fiskars next-generation splitting axes are a true evolution of craftsmanship - purpose-designed for one strike splits of even the thickest logs. The special blade geometry and finish is complemented by a light sturdy shaft and perfect balance. Pick your size according to the task at hand.

The Splitting Axe features a unique cutting edge that easily slices into the wood, which the thick axe blade then pushes apart.

Choose the right size for you

1. LENGTH TEST

Grab the axe on the shaft below the blade. Turn the shaft towards your armpit. If the end of the shaft reaches your armpit, the axe is too long.

2. WEIGHT TEST

Grab the axe at the end of the shaft and let the head rest towards the ground. Lift the head up while turning your wrist close to your body. The axe should be vertical in your hand by the end of this movement. If you can't lift the axe this way, the axe is too heavy.

Saws

To make sawing as easy as possible, you need a reliable saw that is up to the task. We have a variety of saws ranging from saws that cut stems and thicker branches to saws with curved noses for cutting in hard-to-reach or difficult positions.

Xtract™ Saws

Fiskars Xtract™ saws feature a unique, retractable mechanism and include an integrated belt clip for safe and easy transport and storage. Hardened steel blades ensure a long lifetime of sharpness, while a SoftGrip™ handle with finger guard ensures a safe grip.

Plus Folding saws

Fiskars Plus™ folding saws feature three cutting positions to allow you to approach every cut from the best angle. Power Tooth™ blades have razor-sharp, triple-ground teeth for quick and clean cutting, and a secure locking mechanism also holds the blade closed for safe storage and transport.

Fixed blade saws

Fiskars fixed blade saws feature a highly efficient tooth profile for fast, accurate sawing. Impulse-hardened blades stay sharper longer, while a SoftGrip™ ergonomic curved handle with finger guard ensures a safe and comfortable grip.

Bow Saws

Fiskars bow saws are excellent for sawing stems and thicker branches. A curved nose enables cutting in hard-to-reach or difficult positions. Bow saws also cut on both the push and pull stroke for efficient sawing.

Saws

Fiskars saws have teeth designed especially for wood. They allow you to prune branches and clear foliage in difficult positions safely with a lightweight saw. Fiskars Xtract™ range features a unique retractable mechanism and integrated belt clip making them safe to carry and easy to store.

Relentless

Working hard is in your DNA.
Which is why every day, you go out there and dig.
Pry. Strike. And demolish. Your work is rigorous.
Relentless. And unforgiving.
And at the end of the day, you hurt.
We feel your pain.

Truth is, there are plenty of tools out there
that “get the job done.” But how many of
them can also say they work for you?
We can.

We work tirelessly to design tools that not only
perform and last, but reduce negative impact on your
body. It's called Advanced Human Engineering and
it's a process of study, design and validation that puts
you at the center of it all. It's ruthless. But at the end
of the day, it solves problems. Real problems for real
people. And that is the heart of our design DNA.

PowerGear™

Utilise more of your strength

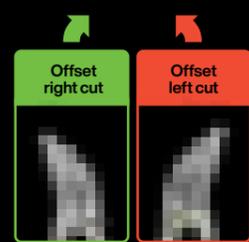

Patented PowerGear™ technology gives you over 40% more power, making it easier to cut sheet metal, especially at the beginning of the cut where more force is required.

Optimised handle span

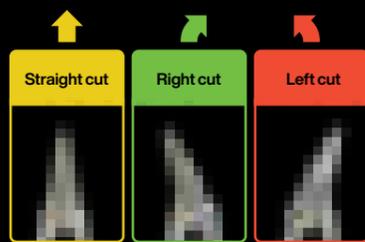

Fits your grip, letting you apply more power without sacrificing cut length.

A tool for every task

Offset aviation snips allow you to keep your hand on top of the sheet for cuts through the center of the sheet. These tools cut at a sharper angle, distancing your hands from sharp, jagged work surfaces.

Ideal for cutting a range of heavy-duty materials.

Shorter cut length increases cutting capacity.
